GoHighLevel + Meta Ads

THE CLIENT'S PROBLEM

The Challenge

A Luton-based loft insulation company was running ads but had no system behind them. Leads came in, but follow-up was manual and slow. By the time the team called back, homeowners had already booked a competitor. Jobs were being lost every week with zero visibility into why.

KEY ISSUES

- No automated follow-up system
- No lead tracking or qualification
- Team wasting hours chasing cold enquiries
- No way to measure what was working

WHAT I BUILT

The System

01

Targeted Meta Ads

Built campaigns targeting Luton homeowners by postcode and property interest. Focused on people actively looking for loft insulation.

02

Pre-Qualifying Lead Form

Homeowners confirmed they needed insulation and were open to a free inspection before entering the system. Filtered out tyre-kickers before the team ever saw them.

03

30 Second Automated Follow-Up

Built an automated SMS and email sequence in GoHighLevel that contacted every lead within 30 seconds of form submission. No lead sat waiting.

04

System Handoff

The team only handled leads who had already confirmed interest. No more manual chasing. The system ran on autopilot.

RESULTS

Pilot Results — 30 Days

10

Homeowner Enquiries

Confirmed they needed loft insulation and were ready for a free inspection.

30 Sec

Response Time

Every lead contacted automatically before they had time to call a competitor.

100%

Automated Follow-Up

Zero manual work from the client's team after system was live.

£654

Average Job Value

Each converted enquiry represented a potential £654 job for the client.

Note: This was a controlled pilot campaign designed to validate the system before scaling.

TECH STACK AND SCOPE

Tools and Deliverables

Meta Ads Manager	Campaign setup, audience targeting, ad creative
GoHighLevel	CRM, automated SMS and email sequences, pipeline tracking
Lead Qualification Form	Custom built to filter for genuine homeowner enquiries
Automated Follow-Up Flows	30 second response trigger, multi-step nurture sequence
Documentation	Full system documentation and handoff to client team
